LANDONBATH

DF-05037-2 High Flow Deck Mounted Bathtub Faucet

ELIO Series

Technical Specification

Product Description

Part of the LandonBath ELIO Series, the DF-05037-2 is a high-flow deck-mounted bathtub faucet designed for soaking bathtubs and walk-in tubs. Equipped with a 40 mm high-flow ceramic cartridge, it delivers a tested flow rate of 14.64 GPM at 60 PSI for rapid bathtub filling. Featuring a minimalist curved spout and a matching single-function hand shower, this model combines contemporary styling with practical functionality. Available in solid brass or 304 stainless steel, it offers flexible material options to suit different market requirements and product collections.
