LANDONBATH

ELIO Series

DF-4901 Single Handle Basin Faucet

Technical Specification

Product Description

The DF-4901 from the ELIO Series is a modern basin faucet engineered for residential and hospitality applications. Defined by smooth cylindrical geometry and a clean horizontal spout profile, it delivers stable water output and precise control while maintaining structural integrity.

Available in either solid brass or 304 stainless steel, this model combines minimalist design with reliable long-term engineering performance for modern bathroom environments.
